

Abigail Figaro

abigail.figaro@gmail.com | [personal website](#) password: costarica2025 | [GitHub](#) | [LinkedIn](#) | New York City, NY

- **Languages & Frameworks:** JavaScript, TypeScript, React, Redux Toolkit, RTKQuery, jQuery, Node.js, Express.js, JSON, Bootstrap, EJS, MUI, HTML, CSS
- **Backend & Database:** MongoDB, Mongoose, JWT Authentication, RESTful APIs, Google Gemini AI API
- **Tools & Deployment:** Git, GitHub, Visual Studio Code, NPM, Vercel, Render, Cloudinary

Experience

Software Engineer

New York, NY

Abigail Designs LLC

July 2023 - Present

- Built production-ready full-stack platform using MERN stack with Redux Toolkit, **reducing server requests by 70%** through intelligent caching and state normalization across 15+ React components.
- **Created a secure authentication system** with JWT refresh tokens and role-based access control, implementing seamless reauth mechanisms handling 401/403 errors gracefully for 3 user roles.
- Engineered scalable **RESTful API with 12+ endpoints** supporting complex CRUD operations, optimizing MongoDB queries to improve response times by 40% and reduce data transfer by 60%.
- Integrated **AI-powered automation** using Google Gemini API for client communications, reducing manual administrative work by 80% while maintaining 95% email delivery success rate

Architectural Designer III

New York, NY

Moody Nolan

May 2022 - May 2022

- Directed the full life cycle of a **\$3M+ culinary school** project from concept to construction documents, managed design documents, consultant coordination, and client satisfaction; led junior designer and maintained schedule alignment.
- Co-managed a team of 4 designers across **3 commercial interior build-out** projects for a national bank by delegating tasks and conducting quality checks resulting in **100% compliance** with client and code requirements.

Architectural Designer II & I

New York, NY

Architecture plus Information

April 2017 - May 2022

- Led spatial design for a **80,000 sq.ft. coworking space** by creating a hospitality-inspired wayfinding system that enhanced user navigation and preserved revenue-generating space. **Awards:** Interior Design NYCxDesign Winner 2023. 2023 Design Awards of Honor
- Produced high-precision construction documents and 3D models using Revit and SketchUp, reducing contractor questions by 20% across 7 high-end commercial projects.

Featured Project

The ArchWay | *JavaScript, React, Redux Toolkit, Node.js, Express.js, MongoDB, Google Gemini AI*

[The ArchWay](#)

Enterprise project management platform designed for architectural firms with role-based authentication, real-time budget tracking across 7 construction phases, and AI-powered client communications. **Key Metrics:** 99% system reliability, 80% reduction in manual tasks, 40% faster perceived loading times

- **State Management:** Built normalized Redux architecture using createEntityAdapter with RTK Query, achieving 70% reduction in API requests through intelligent caching and automatic cache invalidation
- **Authentication:** Implemented JWT system with 15-minute access tokens, 24-hour refresh tokens, and automatic session refresh middleware with graceful error handling
- **Database Design:** Engineered MongoDB schemas with Map-based phase budget storage, comprehensive validation preventing negative values, and lean() queries optimizing response times by 40%
- **Frontend Architecture:** Created 15+ reusable React components with 5 custom hooks, real-time form validation using regex patterns, and responsive design with dynamic budget calculations
- **AI Integration:** Built automated email notification system using EmailJS with Google Gemini API for personalized content generation, achieving 95% delivery success rate with intelligent fallback mechanisms

Education

Master of Architecture, University of Virginia

Bachelor of Design, Major in Architecture, University of Florida
