abigail.figaro@gmail.com | [personal website](#) password: costarica2025 | [GitHub](#) | [LinkedIn](#) | New York City, NY

Skills

- **Languages & Frameworks:** JavaScript, React, Redux, jQuery, Node.js, Express.js, Bootstrap, EJS, MUI, HTML, CSS
- **Databases & Backend:** MongoDB, Mongoose, API Integration
- **Tools & Version Control:** Git, GitHub, Visual Studio Code, NPM
- **Deployment & Cloud:** Vercel, Render, Cloudinary
- **Design & Collaboration:** Photoshop, InDesign, Illustrator, Bluebeam, Figma, Miro, Trello

Experience

Freelance Software Engineer

Remote, NYC

Abigail Designs LLC

July 2023 - Present

- Built responsive, user-centric applications using JavaScript and the **MERN stack** to create scalable and high-performance solutions in React.
- Managed **35+ public GitHub repositories**, creating collaboration, version control, code review to maintain high-quality code and project transparency throughout the development lifecycle.

Architectural Designer III

Hybrid, NYC

Moody Nolan

May 2022 - May 2024

- Collaborated with cross-disciplinary teams as the primary technical liaison using **agile methodologies**, Bluebeam and Miro to accelerate design feedback loop, communicate effectively and reduce drawing review time by an estimated 30%.
- Directed the full life cycle of a **\$3M+ culinary school** project from concept to construction documents, managed design documents, consultant coordination, and client satisfaction; led junior designer and maintained schedule alignment.
- Co-managed a team of 4 designers across **3 commercial interior build-out** projects for a national bank by delegating tasks and conducting quality checks resulting in **100% compliance** with client and code requirements.

Architectural Designer II & I

Hybrid, NYC

Architecture plus Information

April 2017 - May 2022

- Led spatial design for a **80,000 sq.ft. coworking space** by creating a hospitality-inspired wayfinding system that enhanced user navigation and preserved revenue-generating space. My intervention only required 480 sq.ft. and contributed to an **award-winning project**.
- Produced high-precision construction documents and immersive 3D models using Revit, SketchUp and Enscape to accelerate client approvals and permitting and reduce questions from contractors by an estimated 20% across **7 high-end commercial projects** in a fast-paced, agile environment.
- **Awards:** Interior Design NYCxDesign Winner 2023, 2023 Design Awards of Honor

Featured Projects

The ArchWay | *JavaScript, React, Redux, jQuery, Express.js, Node.js, MongoDB*

[In development](#)

- Developing a **role-based** web application to streamline architect-client communication by centralizing timelines, finances, and project phases using OOP.

Fetch | *JavaScript, React, Bootstrap, API Integration*

[Fetch](#)

- Constructed a dynamic interface of all adoptable dogs across the U.S. for breed and location-based filtering to increase discovery and adoption potential.
- Engineered the data retrieval and authentication using body parameters, **cursor-based pagination** and **real-time sorting** for security and optimization.
- Integrated custom hooks, error-handling logic to ensure seamless user experience, **responsive loading states**, and robust API communication.

YelpCamp | *JavaScript, MongoDB, Express, EJS, Node.js, JWT, Passport, Mapbox API, Cloudinary*

[YelpCamp](#)

- Developed a full-stack web application for a campground review, combining EJS templating and MongoDB so users can add campground data, photos, and reviews to an interactive geospatial map using **Mapbox API**.
- Secured user authentication using Bcrypt and salting, middleware validation, and input sanitization to defend against SQL injection and XSS attacks.

Education

Web Developer Bootcamp, Udemy | **Master of Architecture**, University of Virginia | **Bachelor of Design**, Major in Architecture, University of Florida
